

Kepong Meditation Garden

"Where the body meets mind"

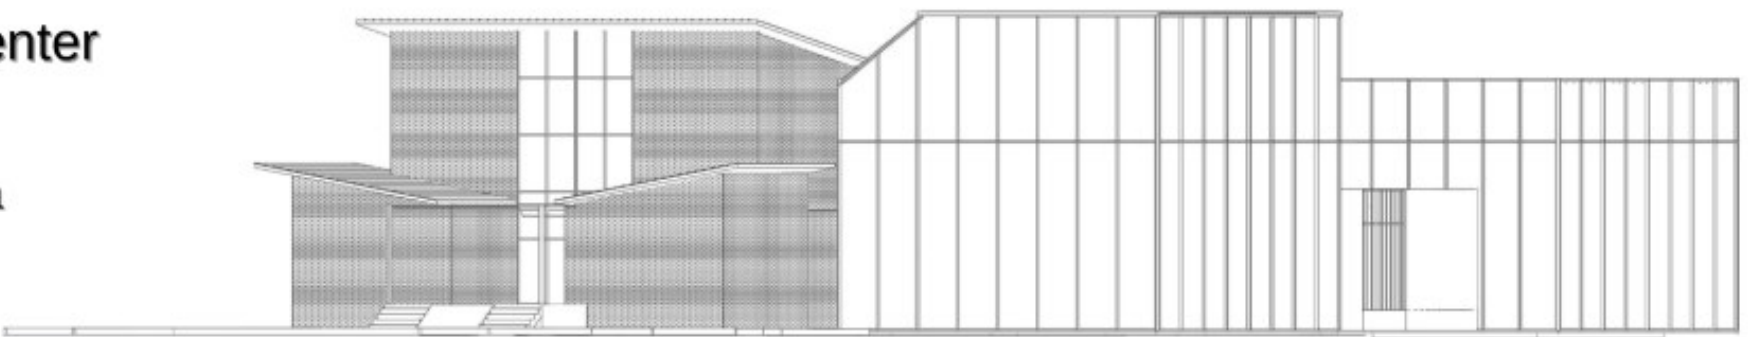

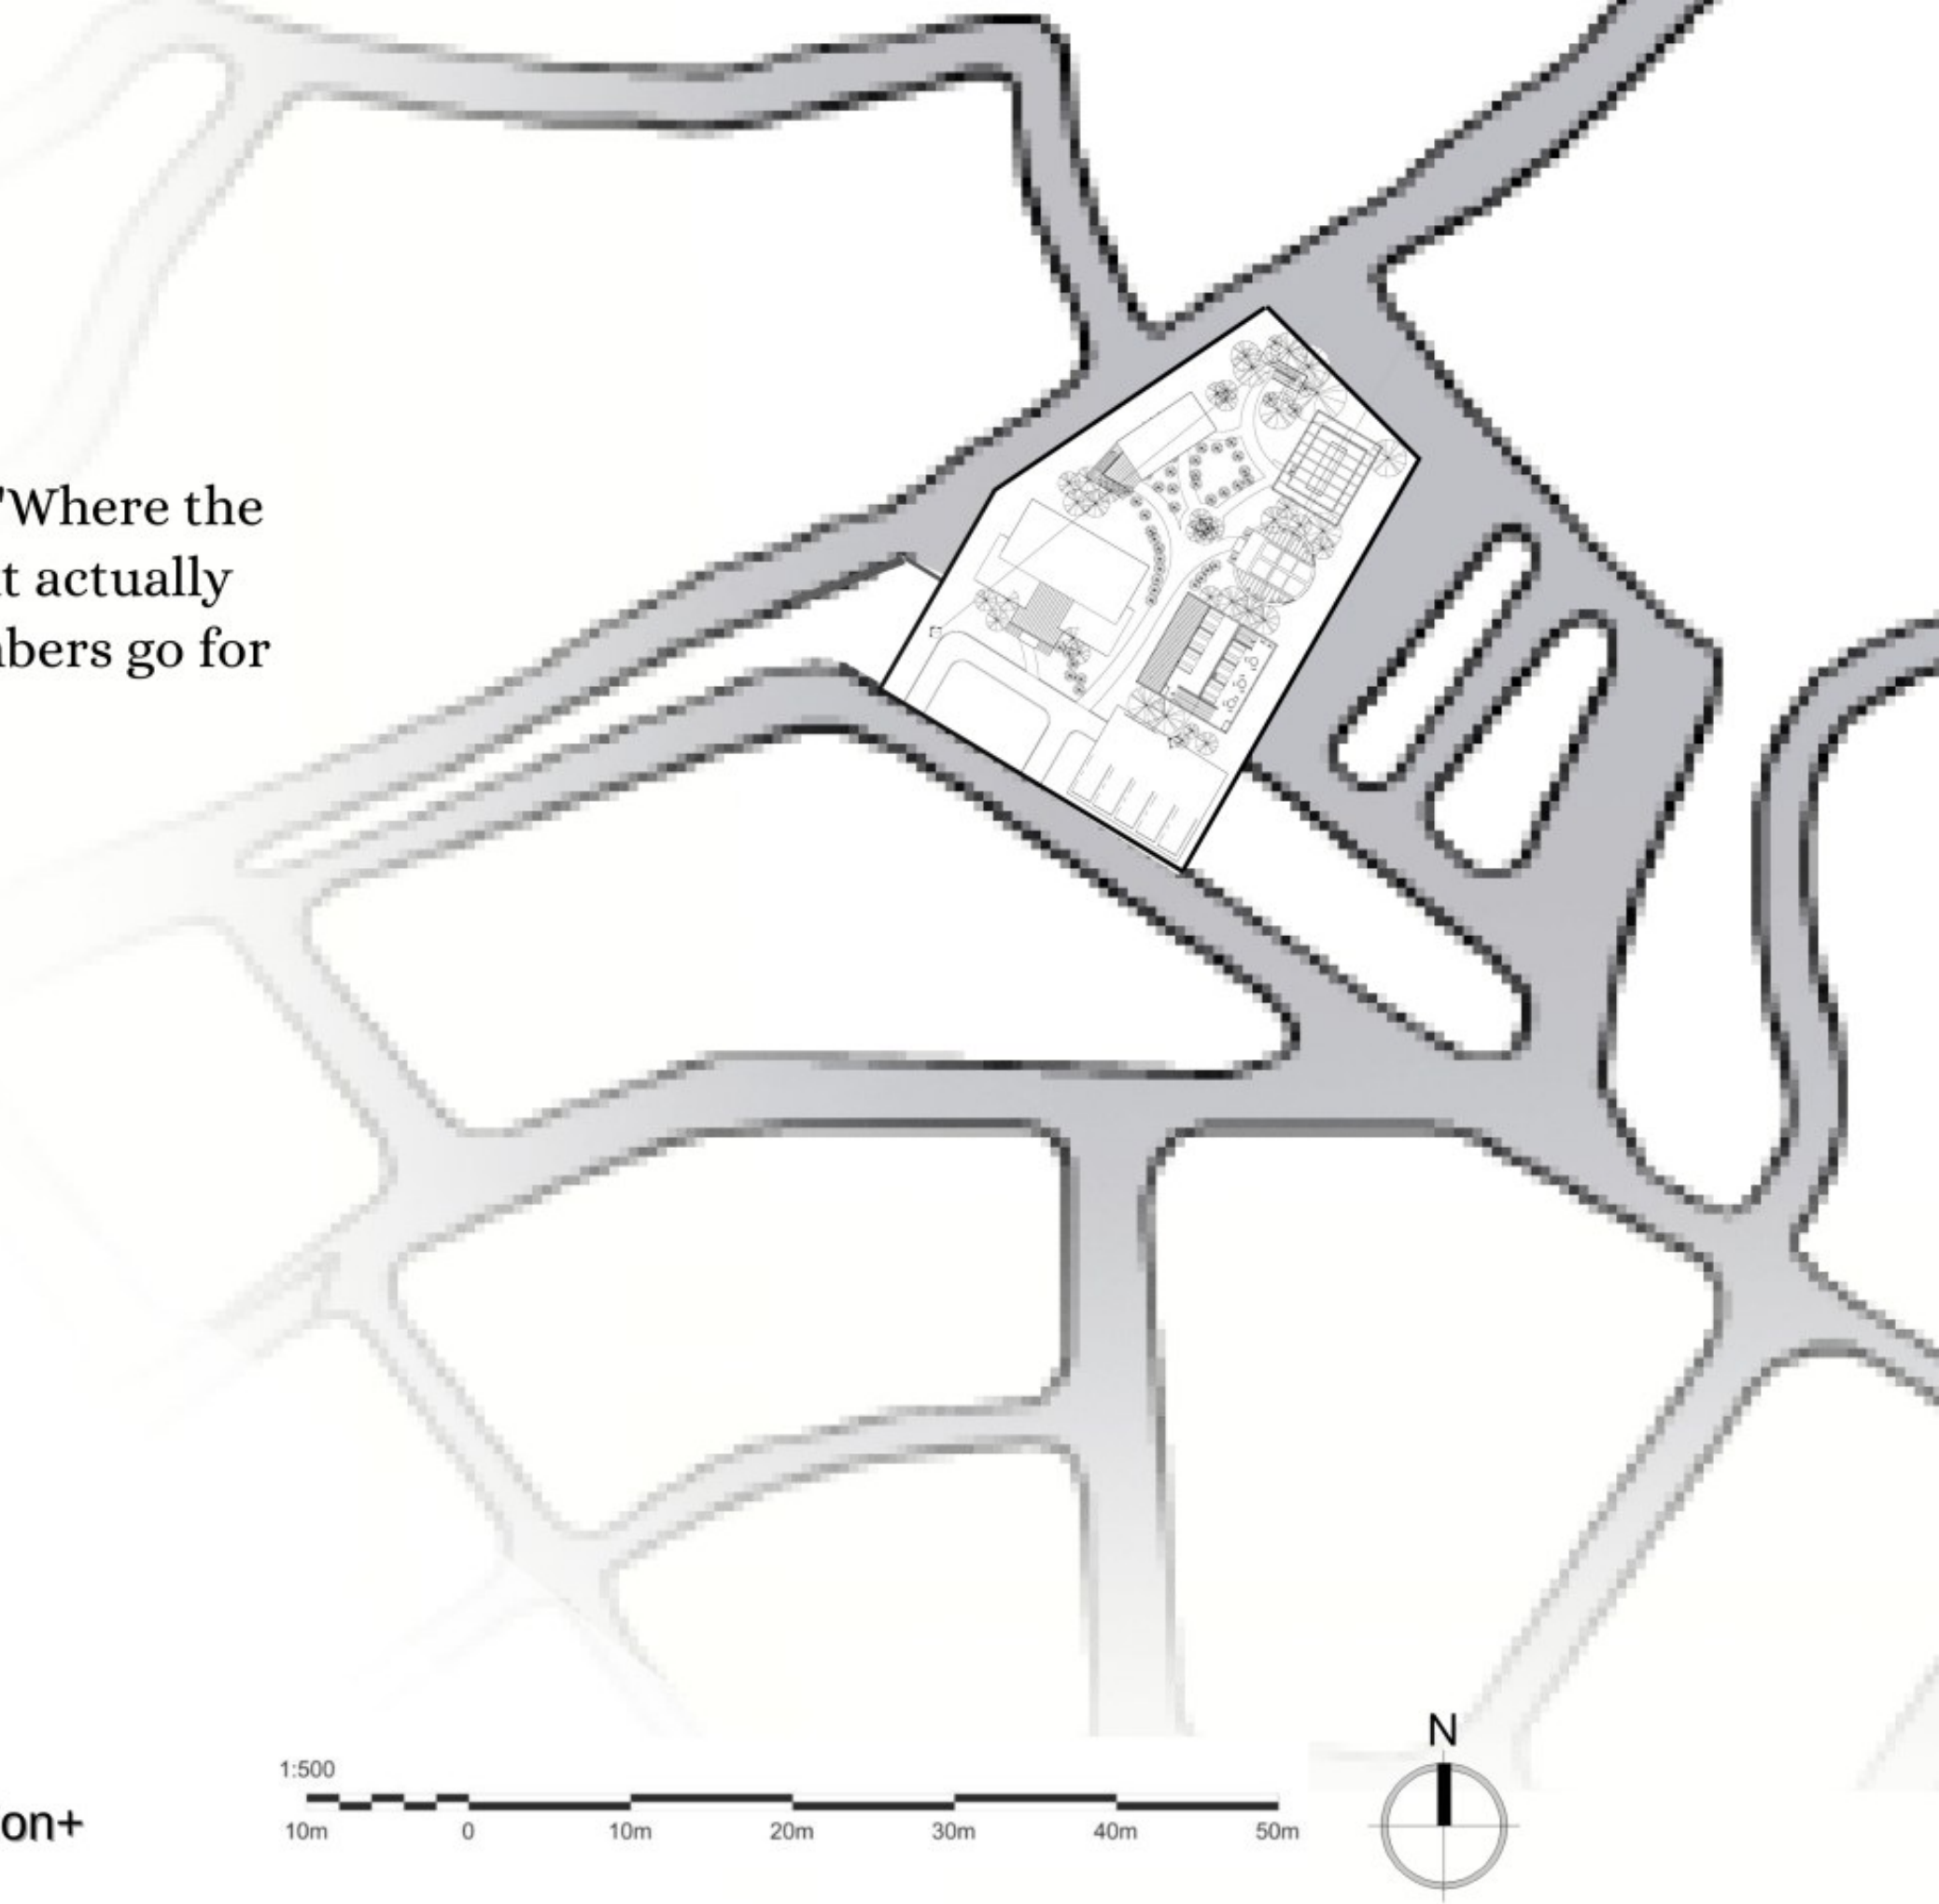

Kepong Meditation Garden is a mental health based wellness center. The concept is "Where the body meets mind". As the focus is area based recovery and mental health, the context actually will help promote the focus of the wellness center as a place where community members go for mental and physical wellbeing.

DESIGN INSPIRATION FROM THE SITE

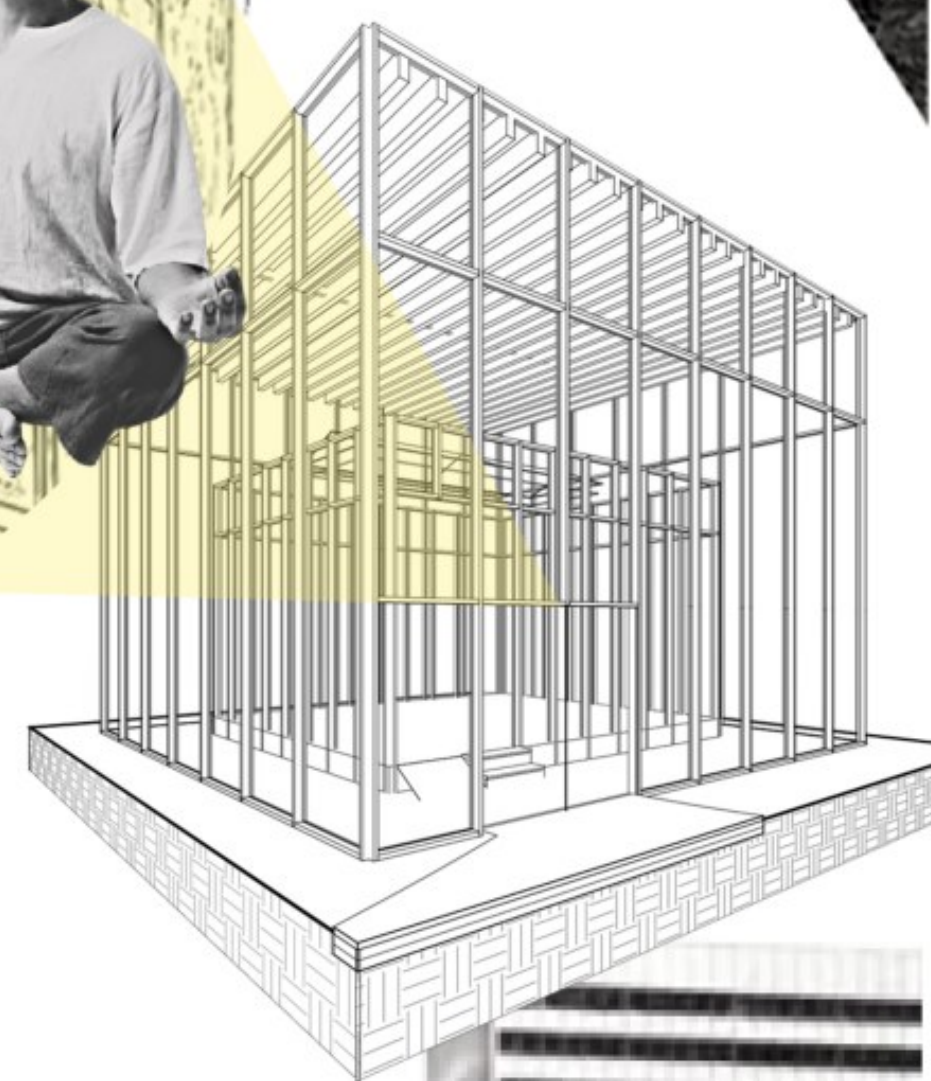

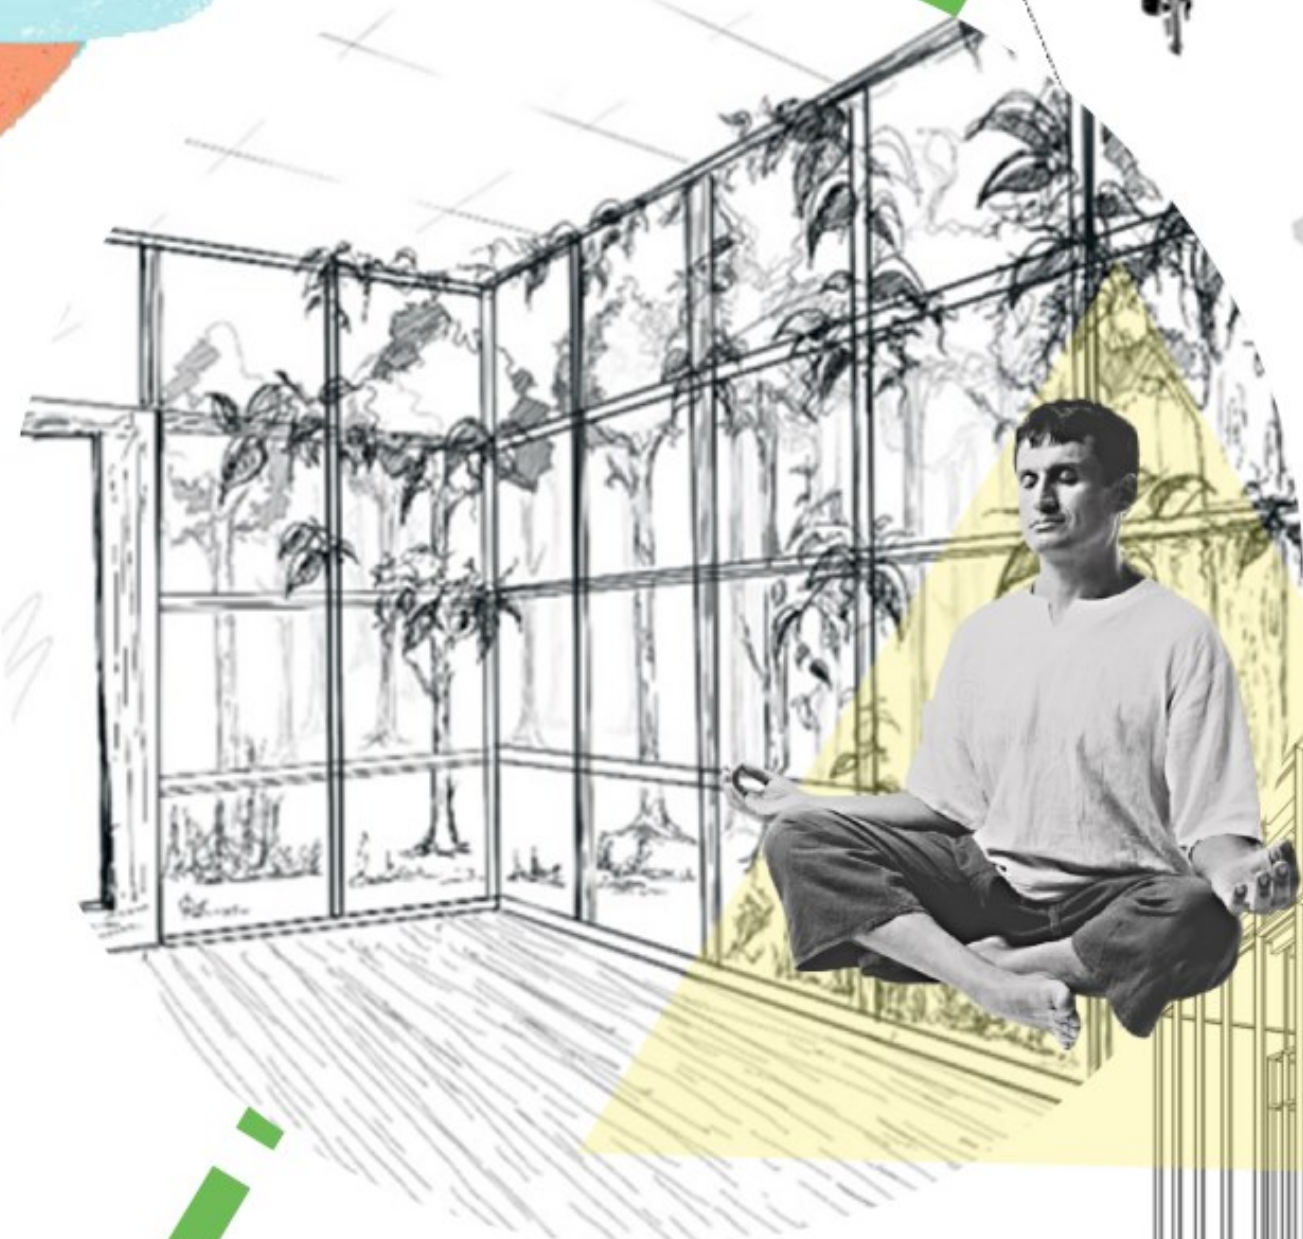

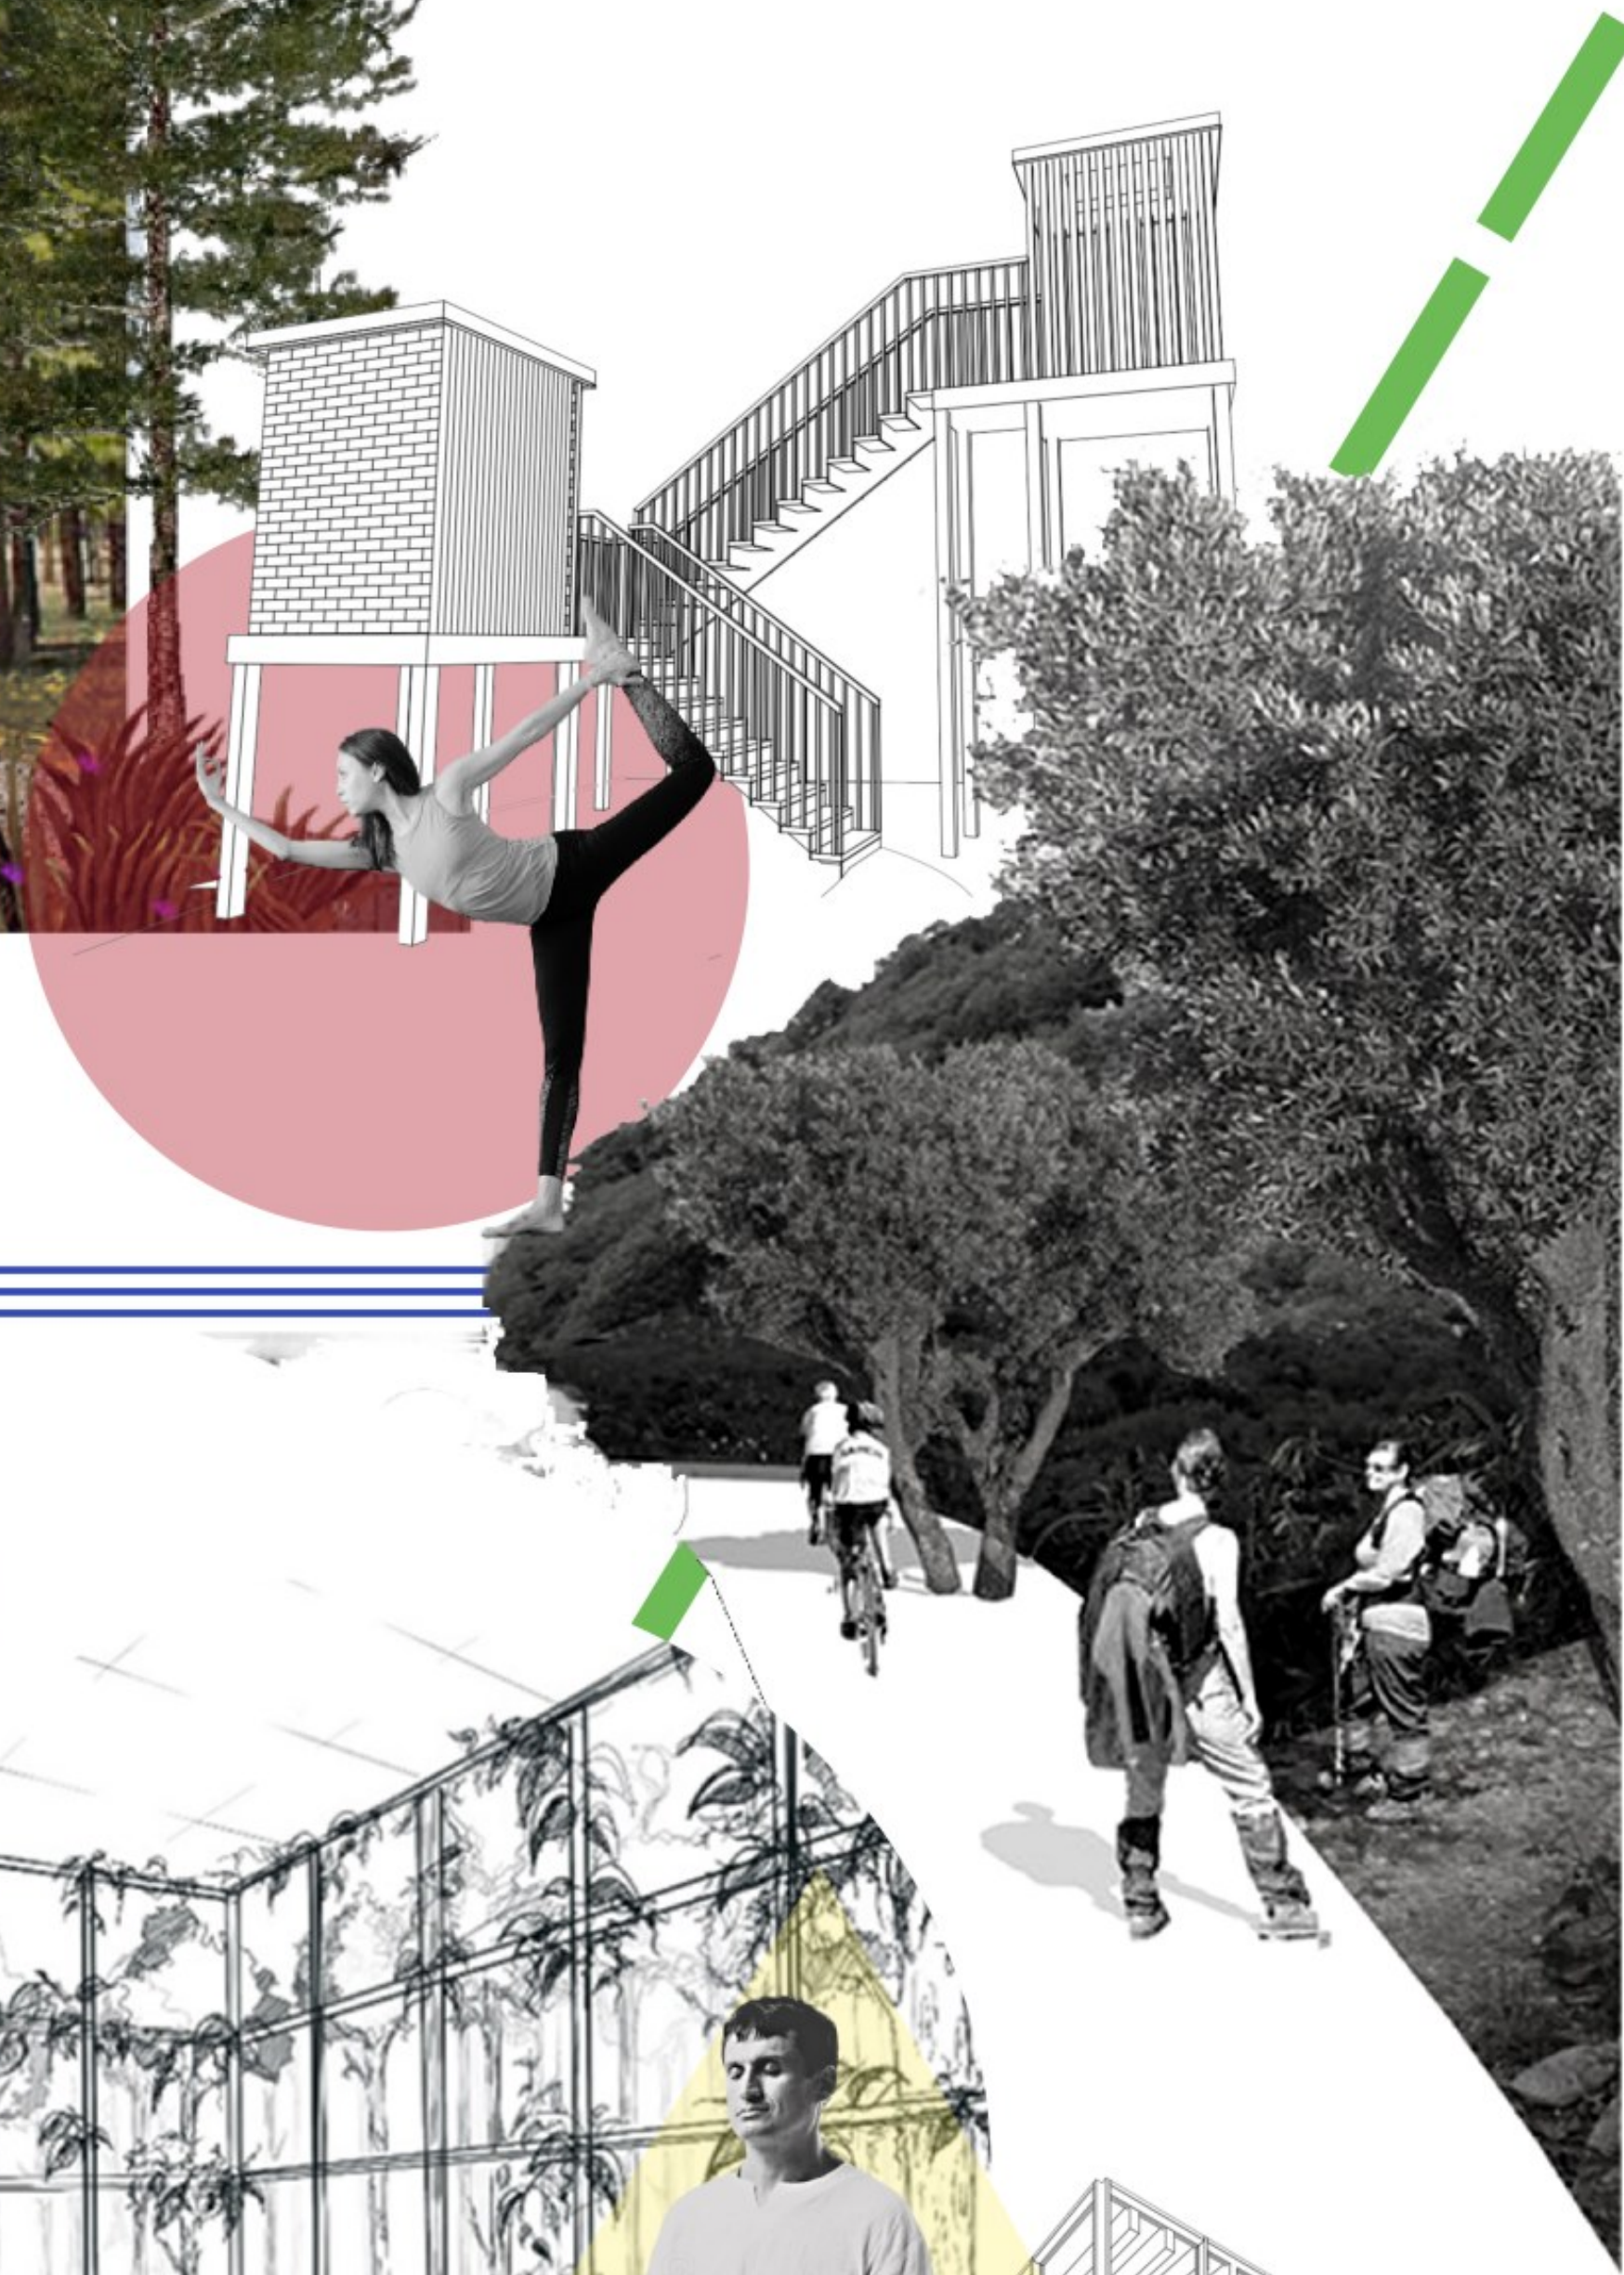

The design was inspired by the existing infrastructure of the site and surrounding area. The materials chosen were also meant to reflect that consideration accordingly. The local community had the opportunity to share their opinions as well since it was going to be used by the community members. In the existing infrastructure, a certain strategy was used so that the timber creates a cooler atmosphere and the visitors can feel the difference in temperature as they walk in to the center. The design is meant to make everyone feel closer and more connected to nature. This becomes a necessity after the monotony of work/school for most people and could certainly make them feel more recharged. In turn, this will lead to a more productive and happier community. Meditating here the use will feel a spiritual connection with the nature.

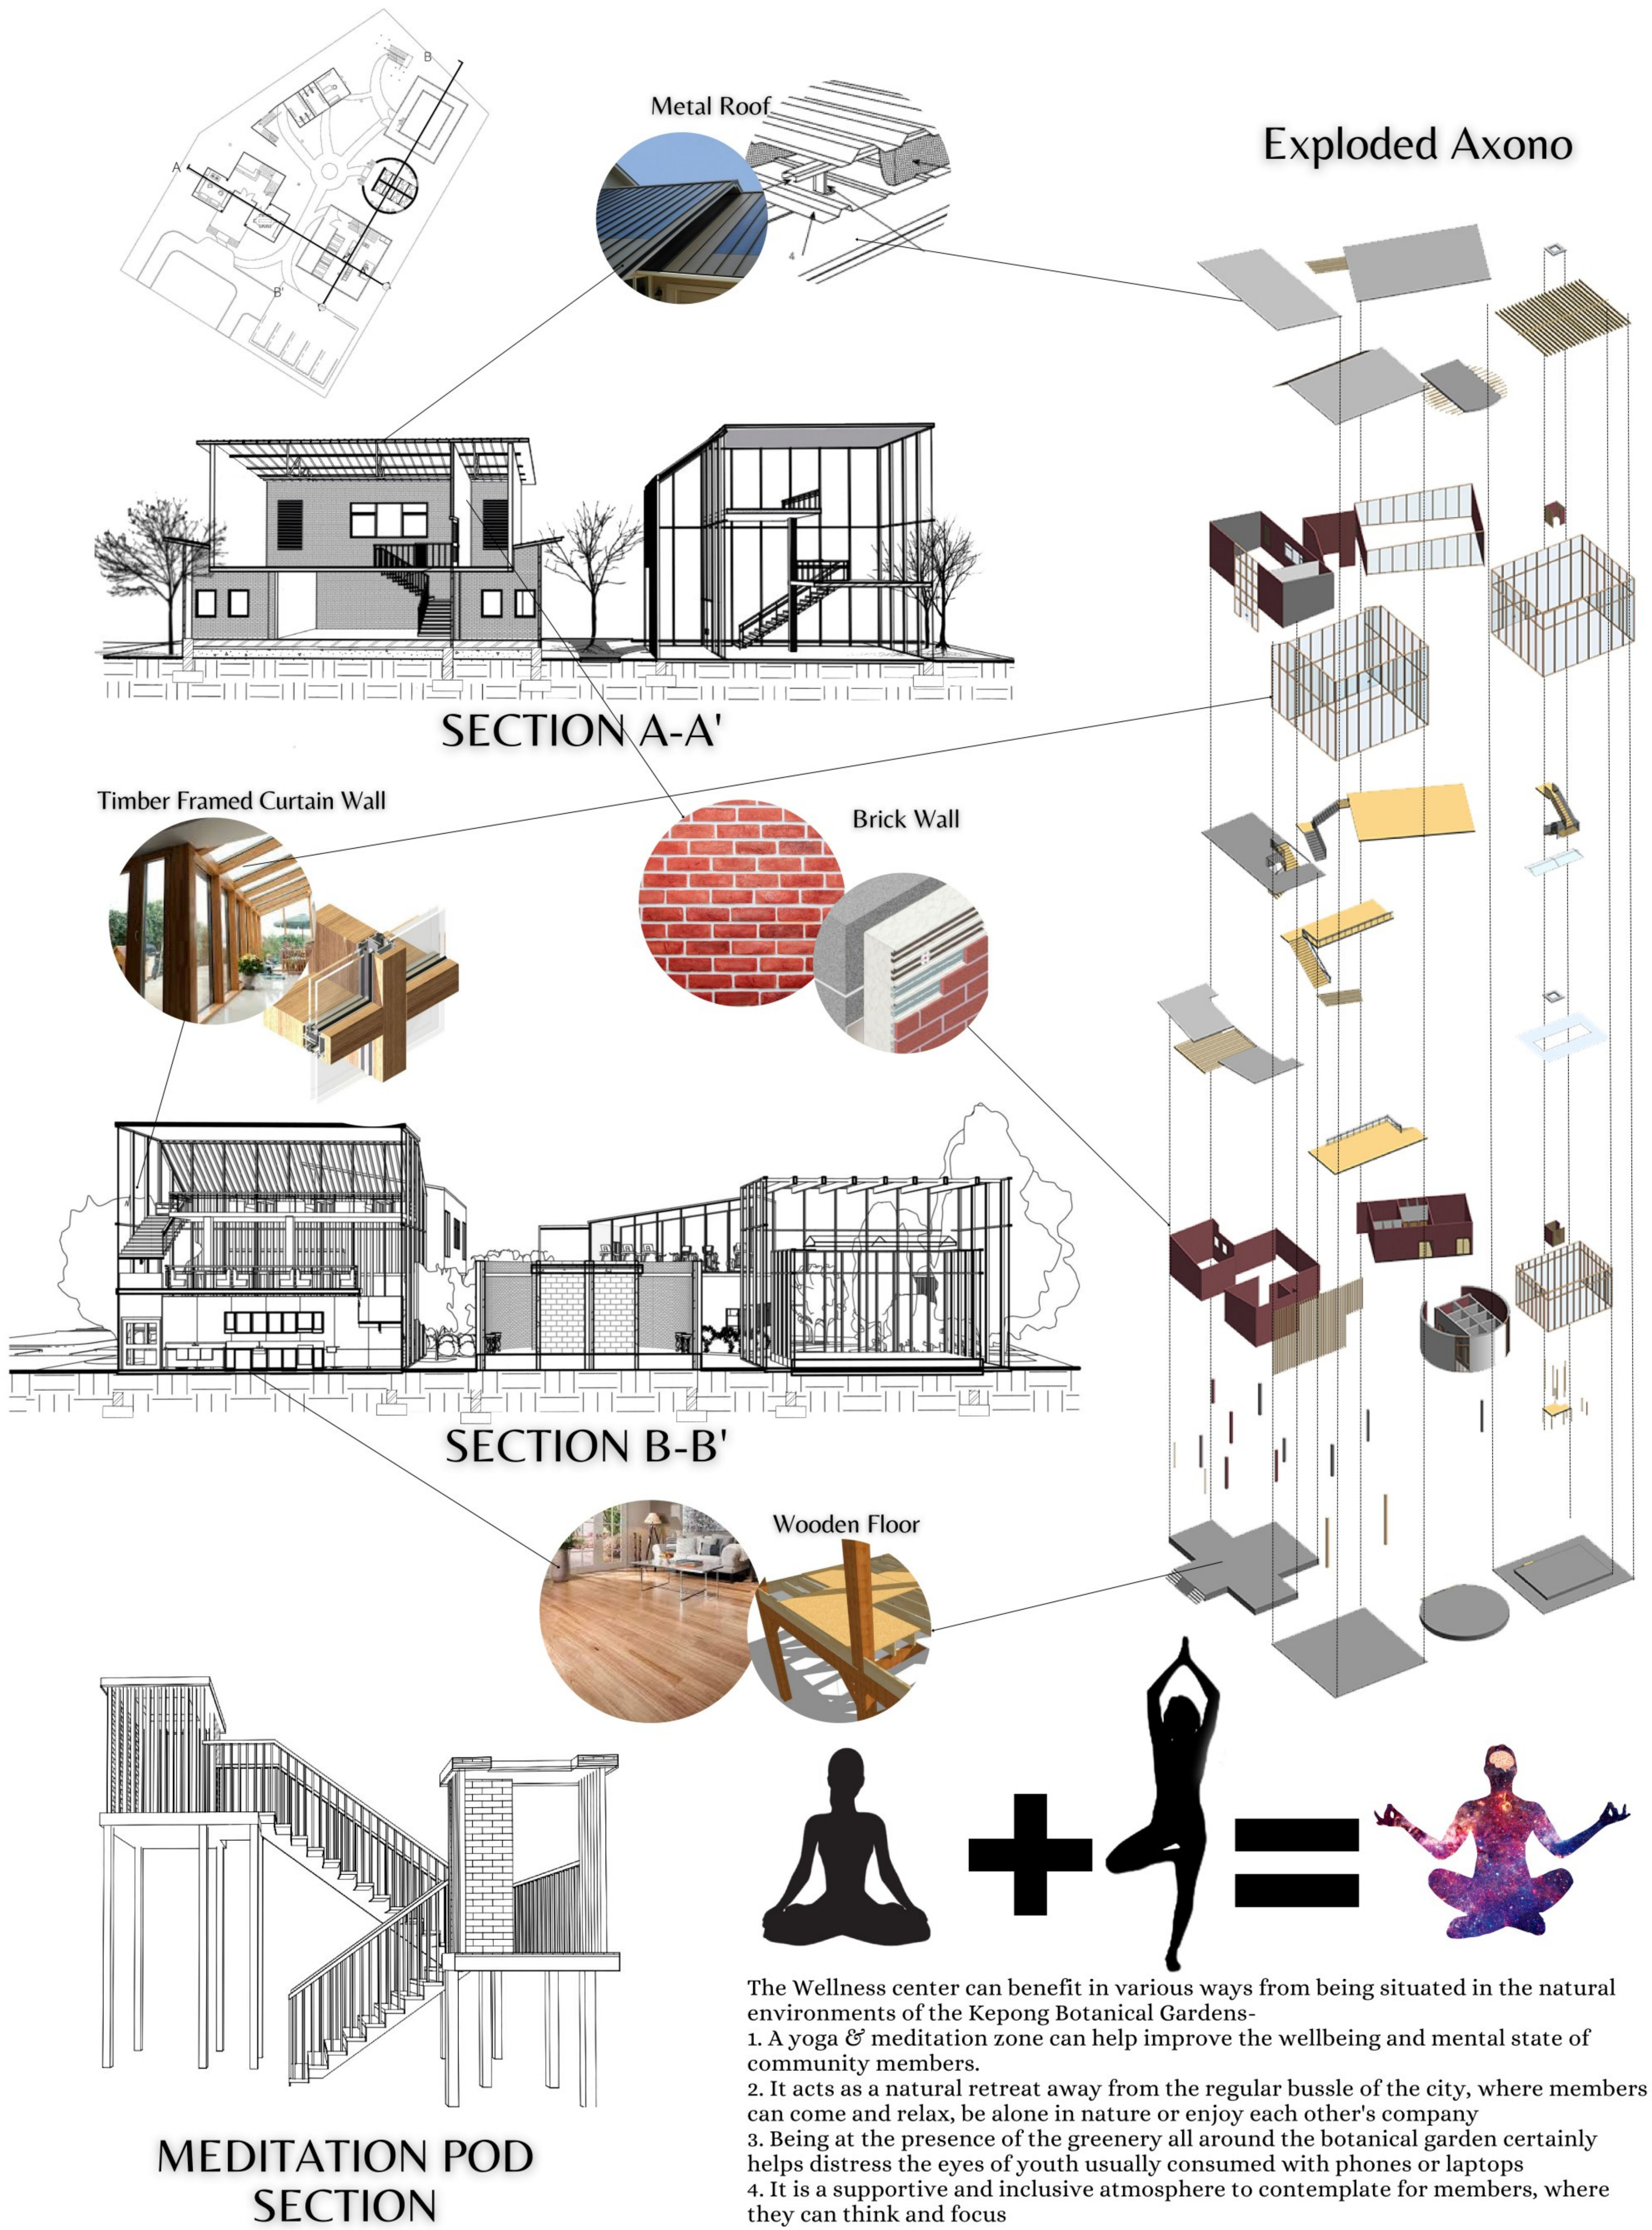

terminalia catappa, ficus benjamina, schizocarpus, 1971 Mangrove Malaysia, gymnosperm living collection 1949

cupanopsis anacardioidea

pandan Pandanus albidifrons 1983

The Wellness center can benefit in various ways from being situated in the natural environments of the Kepong Botanical Gardens-

1. A yoga & meditation zone can help improve the wellbeing and mental state of community members.
2. It acts as a natural retreat away from the regular bussle of the city, where members can come and relax, be alone in nature or enjoy each other's company
3. Being at the presence of the greenery all around the botanical garden certainly helps distress the eyes of youth usually consumed with phones or laptops
4. It is a supportive and inclusive atmosphere to contemplate for members, where they can think and focus
